

ITMA 2019

20–26 June, Barcelona, Spain
Visit us at Hall 8.0, Booth C101

Risk a look through the keyhole.

This flyer gives you an idea of our new booth concept. It puts our products, technologies and services in a new light. Showing you our innovations – at one glance. Presenting our product range – in a previously unseen depth. But most of all, it makes people the center of focus. Openness and transparency in our design are a commitment that reflects in our behavior. We want to keep up the dialog with you – because only together we can move forward.

Groz-Beckert | Hall 8.0

Lounge & Coffee Bar

We create a comfortable atmosphere to provide the perfect basis for exchanges, interviews and private conversation.

Catering Area

We are always there for you and of course we have time and space reserved for expert discussion and a little snack.

Meeting Rooms

We provide topics of conversation and naturally offer rooms to talk about them.

Tufting

Tufting needles, hooks and loopers, tufting knives and reedfinger modules

Sewing

Needles for sewing and shoe machines, INH Quality Management

Weaving

Healds, heald frames, warp stop motions and drop wires, as well as machines for weaving preparation

Innovation Hub

Curious? – Pay a visit to our booth and see for yourself what we have to offer.

Carding

Card clothing for the nonwovens and the short and long staple spinning industry as well as mounting service

Felting

Felting needles, jet strips for hydroentanglement and services for the nonwovens industry

Knitting

Knitting machine needles, system parts, cylinders and dials for circular knitting machines

Entrance

GROZ-BECKERT

Products

Knitting

Knitting machine needles and system parts that rise to any challenge: Groz-Beckert presents exciting innovations in proven quality. One example is the SAN™ SF special application needle – developed for use with staple fiber yarns on large diameter circular knitting machines. Furthermore, we have the TT needle available. Being extremely flexible in terms of pattern options and yarn usage, it opens up completely new business fields.

Felting

When it comes to Felting, Groz-Beckert presents its contribution to the global nonwovens industry. Experience our products in a completely new way. Discover how we can help you protect your knowhow and simplify your needle logistics by creating a customer-specific label. Are you active in the spunlace sector? Groz-Beckert jet strips “made in Germany” provide an important competitive advantage in hydroentanglement of nonwovens.

Carding

Groz-Beckert InLine reinvents the traditional meaning of metallic card clothing for the nonwovens industry. The new wire series is especially characterized by a higher stability of the card clothing teeth. For the spinning industry there are also novelties available: A new revolving top, an improved cylinder wire, an innovative doffer wire culminating in new series of stationary flats.

Weaving

For the weaving industry Groz-Beckert offers a wide-ranging product portfolio. Pay us a visit and experience the innovation and automation in weaving preparation live: An important step towards Industry 4.0. A variety of products in all process stages of a weaving mill completes the presentation at ITMA Europe.

Tufting

Rising demands on the quality of the end products also require tufting tools to deliver maximum performance. Groz-Beckert meets these requirements with a unique quality promise: A tested and coordinated selection of materials, adherence to the tightest tolerances, and dimensional conformity of all individual tools – the basis for a functioning Gauge Part System.

Sewing

Wide-ranging requirements demand a wide range of products: When processing fine fabrics the challenge is to avoid damaging the material. The special application needle SAN® 10 combines the requirements for protecting the material and stability. But Groz-Beckert not only offers the right needle for every seam, we also support you in your sewing operation: Discover your way of improving the handling of machine needles with the INH Quality Management.
